

100 kva solar system price

Overview

The typical cost for a 100kW solar system is approximately \$200,000. However, it's important to note that prices for solar systems have come down substantially over the past 10 years. How much does a 100kW Solar System cost?

As per the table, the average cost of a 100kW solar power system as of August 2024 is \$87,920 including GST and the STC upfront rebate. The graph below - from our Commercial Solar PV Price Index - shows average price trends for 100kW solar systems since Solar Choice started keeping track in May 2014.

Should I install a 100kW Solar System?

“If you are considering installing a 100kW solar system, we recommend you to go for an on-grid solar system (subject to low power cuts), because a 100kW on-grid system is less expensive than other types of 100kW systems, and solar net-metering is also available for this system.”.

What is a 100kW Solar System?

100kW solar systems are among the most popular commercial solar system sizes in Australia, as this size is the cutoff point for up-front incentives through the federal government. This article provides an overview of most of the key points that businesses need to know if they are considering a 100kW solar system for their commercial premises.

How much energy does a 100kW Solar System produce?

A standard 100kw solar system in Sydney, NSW would produce about (3kWh x 100kW =) 300kwh on a winter's day, while in the peak of summer, the same 100kw solar PV system would produce around (5kWh x 100kW =) 500kWh. A similar system in Brisbane might produce as much as 350kWh in winter and 550kWh on a day in summer.

Should you invest in a 100kW Solar System?

Investing in a 100kW solar system can be highly beneficial, especially if you live in an area with decent sun exposure. With the potential to generate \$31,025 worth of electricity annually, you can expect a 20% return on your investment based on the current costs of solar panels (\$200,000 for the system).

What is a 100kW off-grid Solar System?

A 100kW off-grid solar system provides continuous power to all commercial and industrial areas even in the most remote locations. This solar system ensures that you will never run out of power.
