

# 166 Photovoltaic panel efficiency

## Overview

---

We reviewed the top brands currently available in the UK and established how efficient they were. We also factored in a number of other considerations that are important to solar panel installs, including the following: When considering the best solar panels, we considered the following factors: 1. Efficiency of the.

In the table below you can see a quick comparison of the most efficient solar panels currently available, as you can see, the difference between them is negligible.

The Maxeon range is one of the latest solar panels ranges offered by leading solar panel brand SunPower With their UK offices based in Milton Keynes, the American companies Maxeon range has been placed in position.

Yingli Solar was founded in 1998 by Liansheng Miao, and has since become one of the largest manufacturers of solar panels in the world. Yingli Solar is headquartered in Baoding, China, and has over 30,000 employees.

The second most efficient is the SunPower Maxeon 3. With an energy efficiency of 22.7%, making it just a little less efficient than the most efficient brand from the same brand, the Maxeon.
