

184 million dollar solar company

Overview

Will Chinese companies build US solar panels?

Construction of U.S. solar-manufacturing plants by Chinese companies is also surging as they too seek to take advantage of U.S. incentives. Chinese companies will have at least 20 GW worth of annual solar panel production capacity on U.S. soil within the next year, enough to serve about half the U.S. market, according to a Reuters analysis.

Who is the world's most valuable solar manufacturer?

A US company has become the world's most valuable solar manufacturer for the first time since 2018, as Chinese rivals suffer from a profit-slashing price war and an onslaught of trade barriers erected by Washington. First Solar Inc. gained 1.5% Friday to end trading with a market capitalization of \$21.15 billion.

Where did solar energy come from in 2023?

While almost none came directly from China in 2023, some 80% came from Vietnam, Thailand, Malaysia and Cambodia – home to factories owned by Chinese firms. Washington slapped tariffs on solar exports from those four Southeast Asia nations last year and expanded them in October following complaints from manufacturers in the United States.

Which Chinese companies invest in US solar equipment factories?

Here is a list of Chinese companies investing in U.S. solar equipment factories: Illuminate is a joint venture between Chinese solar equipment maker Longi (601012.SS) and U.S. clean energy project developer Invenergy. The company started producing solar panels at a five-gigawatt plant in Pataskala, Ohio in February.

Which solar companies are going further afield?

Others are going further afield. JinkoSolar (JKS.N) said in July it had signed an

almost \$1 billion deal with partners in Saudi Arabia to build a new 10 GW solar cell and module plant in the kingdom. Construction of U.S. solar-manufacturing plants by Chinese companies is also surging as they too seek to take advantage of U.S. incentives.

Are Chinese solar companies moving to Indonesia and Laos?

While Chinese firms have been moving their solar manufacturing for years, the scope of the shift to Indonesia and Laos in this latest phase has not previously been reported. More than a dozen people in five countries, including employees at Chinese plants, officials at non-Chinese solar companies and lawyers were interviewed for this article.
