

1962 studebaker gran turismo hawk power steering system

Overview

What did the 1964 Studebaker Gran Turismo Hawk look like?

Inside the 1964 Studebaker Gran Turismo Hawk, three-point rotating door handles -- similar in design to the steering wheel -- set a futuristic theme. The ribbed metallic/vinyl seats helped keep one's body cool and comfortable. The instrument strip and console leaned in a curve toward the driver.

What engine does a 1962 Studebaker Gran Turismo Hawk have?

This 1962 Studebaker Gran Turismo Hawk is powered by a 259ci V8 linked with a four-speed manual gearbox and a Twin Traction differential, and it was acquired out of Florida by the seller in 2021. The body was repainted black under previous ownership, and the cabin is upholstered in black vinyl with white inserts on the seats.

Why did Studebaker change the Gran Turismo Hawk?

The Gran Turismo Hawk was a great innovation, but people wondered why Studebaker felt the need to change it for 1962. By 1961 the Hawk was six years old, and largely unchanged style-wise. And from 1959 to 1961, the Hawk was promoted as a low-price pillared coupe, forsaking its place in the personal-luxury market.

How many Studebaker Gran Turismo Hawks were made?

Only 1,767 1964 Studebaker Gran Turismo Hawks were made. But it was already too late. Sherwood Egbert fell ill with cancer. He had surgery, recovered, relapsed, and finally had to resign (tragically, he died soon after, at an early age). Studebaker's money was so low by now that the writing was clearly on the wall.

Did Studebaker make a gran turismos?

A stroked version of the 289, the R-4 version boasted twin four-barrel carbs and 280 horsepower. The supercharged R-3 cranked out 335 horses. Although

listed, no Gran Turismos were factory built with either engine. Still, the 120-mph speedometers on the Hawk were changed to 160-mph units at mid-year to enhance Studebaker's performance image.

Who created the 1962 Gran Turismo Hawk?

Brooks Stevens was a recognized industrial designer of three decades standing. As such, he had a clear vision of how to go about creating the 1962 Gran Turismo Hawk. The situation at Studebaker required that Egbert work fast. There was little time and less money.

[1962 Studebaker Gran Turismo Hawk](#)

The introduction of Studebaker's Gran Turismo Hawk in the fall of 1962 was something akin to an ICU patient hopping out of bed and reaching for a pack of Luckies. The industry had assumed that Studebaker's long-running C/K coupe/hardtop, which had made its debut in 1953, as the Starliner, had finally run its course at the dawn of the 1960's.
