Are solar panels easy to install?

Installing solar panels is usually relatively quick and straightforward, but it's still worth getting to know all the ins and outs of how it happens. After all, considering how much solar panels cost, it makes sense to understand the process.

Can solar panels be installed on a flat roof?

You can install solar panels on a flat roof, but it's not usually a good idea for domestic properties.

How do solar panels attach to a roof?

Installers fix solar panels to a roof by lifting up some roof tiles and attaching mounting brackets to the rafters, before carefully placing the tiles back where they were. They'll then attach rails to these brackets, before locking solar panels into the rails.

How many solar panels should a house have?

The ideal property for solar panels would have a decent amount of space on its roof - typically we look for homes that can manage at least eight panels,

but ideally it should be able to fit ten or more. It's best for a roof to be south-facing, but in some cases it's actually better with east-west roofs, as you can get more panels on.
