

3000w solar photovoltaic power generation

Overview

You can access the stored power in different ways. For AC power, there are six 120V 20A outlets and one 30A outlet in the main unit (the AC300). For DC power, there's one 24V 10A car outlet and one 12V 30A RV outlet in the AC300 plus another 12V 10 A outlet in the B300 battery. As for USB, you get one 100W USB-C port.

The Bluetti AC300 is just as versatile as the EcoFlow Delta Pro when it comes to recharging. You have the usual three options: AC outlet, solar and vehicle 12V port. Max AC input is 3000W (included 15A cable only puts in).

Similar to the EcoFlow solar generator, the Bluetti AC300 has Bluetooth and WiFi connections that let you monitor and control the power station from an app. You can also monitor it via the display on the main unit.
