

# 8 wonders of our solar system

## Overview

---

How many episodes are in Wonders of the Solar System?

Wonders of the Solar System was first broadcast in the United Kingdom on BBC Two on 7 March 2010. The series comprises five episodes, each of which focuses on an aspect of the Solar System and features a 'wonder' relevant to the theme. The series was described as one of the most successful to appear on BBC Two in recent years.

Will there be a day of Wonders in our Solar System?

Maybe there will be one day, when probes and people have traveled to and explored every planet and moon, every asteroid and chunk of icy debris, every nook and cranny around the Sun. But that day is a long way off. So, in the meantime, I've compiled my list of seven places in our solar system that I consider to be worthy of the status of wonders.

What are some interesting facts about our Solar System?

Our solar system is in one of the Milky Way galaxy's spiral arms called the Orion Spur. 5. A Long Way Around Our solar system takes about 230 million years to orbit the galactic center. 6. Spiraling Through Space The Milky Way is a barred spiral galaxy. 7. Room to Breathe Our solar system has many worlds with many types of atmospheres. 8.

Will there be a second Wonders of the universe?

Brian Cox from his Twitter account stated that there would be a second series, Wonders of the Universe, with the same crew and BBC science team. It was first broadcast on 6 March 2011 in the UK. The second series has a similar basis to series one, but features the universe. The new series consisted of four episodes as opposed to the previous five.

What is eyes on the Solar System?

Eyes on the Solar System: A real-time visualization of our solar system using

planetary science data. The Near-Earth Object (NEO) Surveyor is an infrared space telescope being built to help advance NASA's planetary defense efforts — the first space telescope specifically designed to hunt asteroids and comets that may be potential hazards to Earth.

When did wonders of the universe come out?

In the United States, this programme was aired by Science Channel each Wednesday at 9pm E/P from 4 August 2010. Brian Cox from his Twitter account stated that there would be a second series, Wonders of the Universe, with the same crew and BBC science team. It was first broadcast on 6 March 2011 in the UK.
