

Act green energy solutions

Overview

What does act do?

Global presence. Local reach. ACT provides tailor-made sustainability solutions within all compliance and voluntary markets. As a major player in the global energy transition, ACT helps organizations hit their climate targets by purchasing clean energy certificates and sustainable fuels.

Who is Act energy?

Bringing 100% local, award-winning service to the ACT and surrounds. We have been proudly servicing the local area for over 100 years, making us the largest and longest-running energy provider in the region. Learn more about the members of our executive team. We provide support to the region through our various community programs.

What is the Green Energy Act?

With its across-the-board prices for renewable energy, and additional financial help for community groups, the Green Energy Act lets everyone profit from producing clean power. The point of the act is to level the playing field, and not require a farmer to compete with Bruce Nuclear when he wants to sell his electricity to the grid.

Why did act join Green Project technologies?

On joining ACT, Green Project Technologies CEO and Founder Sam Stark stated, "ACT was the ideal company for us to join forces with.

How can act help you create a sustainable future?

ACT helps clients worldwide create a sustainable future in four key areas:
Emission Markets - Encouraging emission reduction, negative emission solutions tied to carbon removal, and cross-border carbon pricing. Renewables - Driving the substitution of fossil-energy based power generation with renewables.

Where are Act products made?

With a growing portfolio of over 70 products in 40 plus countries, ACT's teams in Amsterdam, Shanghai, New York, and Paris deliver tailor-made solutions backed up by extensive market knowledge.
