

# **Adt security system hard wired power supply**

## Overview

---

What is the ADT command power supply with barrel connection?

The ADT Command Power Supply with Barrel Connection is a power adapter that is used to power the ADT Command Panel instead of using a wire with a custom length with the screw terminal transformer. However, the wire is connected to the transformer already and is one piece and cannot be changed or redone.

Does ADT offer wired or wireless home security?

Traditionally, home security systems relied on a wired home phone to provide an around-the-clock link to a security company, but things have changed with the advent of cellular technology. So, ADT has evolved to offer both wired and wireless home security solutions.

Do I need a replacement part for my ADT smart home security system?

Important Note: This replacement part is specific to customers whose ADT smart home security System was professionally installed by ADT. **IMPORTANT NOTE:** If your system is professionally monitored, prior to unplugging the Keypad, place your ADT security system in Test Mode to avoid a tamper alert.

How do I disarm my ADT+ system?

Disarm your system at the Touchscreen, in the ADT+ app, at the Base, or the Keypad: In the ADT+ app (via Touchscreen or smartphone): Log into the app. Tap the Home icon on the dashboard. Select DISARM mode, then enter your Security Code. At the Base: Key in your Security Code and select Disarm. On the Keypad: Press OFF then enter Security Code.

How do I Reset my ADT keypad?

Plug the keypad power supply back into its power source at the outlet and then power cord into the device. Align your Keypad on the wall mount and twist it to lock it into place. Take your system out of Test Mode by returning to

the Monitoring page in the app and selecting End Test Mode Now. You can now resume regular activity with your ADT Keypad.
