

Aedb approved solar companies

Overview

What does the AEDB do?

Under the Regulations, the AEDB carried out the certification of vendors/installers/service providers for the installation of wind and solar systems (both net-metering systems and off-grid systems).

What is AEDB certification?

Previously, the AEDB had approved the AEDB (Certification) Regulations in 2018 for the safe, secure, and quality-assured supply of solar and wind energy generation projects, products, systems, installation, and servicing thereof for small-scale industrial, agricultural, commercial and residential consumers.

How will the new AEDB regulations impact the energy sector?

The CEO of the AEDB, Shah Jahan Mirza, stated that the new simplified Regulations will catalyze the promotion and deployment of clean and green energy in Pakistan through Distributed Generation exploiting Pakistan's huge wind and solar energy potential.

How many net-metering-based systems has AEDB certified in Pakistan?

In this regard, the AEDB has certified a total of 126 vendors/ installers/service providers who have installed approximately 13,000 net-metering-based systems across Pakistan with a cumulative capacity of more than 200MW.

What are the certification regulations for solar & wind projects?

The Alternative Energy Development Board has issued simplified Certification Regulations for installers of solar and wind projects in the country in line with the vision of the present government's policy of 'Ease of Doing Business' and for the promotion of clean and green energy.

What does AEDB stand for?

The Alternative Energy Development Board (AEDB) has enacted new Alternative Energy Development Board (Certification) Regulations, 2021, effective from 30 August 2021.
