

Aerial photography of the company s photovoltaic panels

Overview

In 2021, Hegen traveled through the United States, France, and Spain to photograph vast solar energy infrastructures that will be delivering clean energy for generations to come. The photos were shot from a helicopter. “In a single hour, the amount of power from the sun that strikes the Earth is more than the entire world.

The neatly-arranged circular facilities seen in Hegen’s images are solar thermal power plants, which focus sunlight from thousands of moving mirrors called heliostats onto a central.

“Aerial photography, to me, is like data visualization for scientists,” Hegen says in a 2022 interview with Fortune. “The elevated perspective has such a remarkable ability to show the scale and context of a landscape. I.
