## Overview

---

In general, there are two main types of solar panels designed for home use. Monocrystalline solar panels are highly efficient, converting more than 20% of the collected sun's energy into usable power. Hig.

Higher wattage typically equals a higher price per panel. However, a panel that generates twice the power isn't likely to cost twice as much. Meaning you may be able to buy.

Be wary of any solar panel that's not covered by a long-term output and defect warranty. Even the cheapest solar panel is expensive if it fails and isn't backed up by a warranty. A.

The amount of power your home needs to operate off the grid is very different from the amount necessary for simply operating a few appliances. The difference is that the large, expe.

Kits and panels are available from some manufacturers that are designed for DIY installation. Installing your own solar energy system can cut labor charges out of your total syste.
