Overview

What is aluminum air technology?

Our Aluminum-Air technology releases the energy initially injected into aluminum for a variety of applications, using aluminum as a clean and safe energy carrier. Fully recyclable and reused as an energy carrier with no material loss, aluminum creates a clean and sustainable circular value chain. Easy to transport and move energy across the globe.

Who owns the UK's energy storage projects?

These projects are owned by both private energy storage companies and publicly listed energy storage funds. Kona Energy works with the UK's leading energy storage financiers, equipment suppliers and consultants to develop the UK's optimal battery storage projects. The UK has a legally binding commitment to become net zero by 2050.

Why is Panasonic a leading energy storage company?

Thanks to a wide and varied portfolio of solutions, Panasonic has positioned itself as one of the leaders in the energy storage vicinity. Panasonic is one of the industry's top names due to its advances in innovative battery technology alongside strategic partnerships and extensive experience in manufacturing high-quality products.
