

# **Analysis of domestic photovoltaic inverter market**

## Overview

---

What is the global PV inverter market size?

The global PV inverter market size was estimated at USD 13.09 billion in 2023 and is expected to expand at a compound annual growth rate (CAGR) of 18.3% from 2024 to 2030.

Why is the PV inverter market growing?

Increased global PV demand: The increased global demand for photovoltaic (PV) systems presents a massive opportunity for the PV inverter market to grow substantially in the coming years.

How is the solar PV inverter market segmented?

By inverter type, the market is segmented into central inverters, string inverters, and micro-inverters. By application, the market is segmented into residential, commercial and industrial, and utility-scale. The report also covers the market size and forecasts for solar PV inverters across major regions.

What is the market share of solar PV inverters in 2021?

The utility segment of the solar PV inverters accounted for the largest market share in 2021 and is expected to reach USD 7,716 million by 2030 at a CAGR of 5.95%. Utility-scale solar projects require reliable, robust, and scalable infrastructure. The most widely used PV Inverter in the utility sector is the central and string inverter.

How will the North America solar PV inverter market grow?

North America solar PV inverter market is also expected to grow at a fast pace during the forecast period as the United States is a significant market for various types of PV inverters. The region's growth is further driven by favourable government incentives, increasing awareness of clean energy, and declining solar panel costs.

Which region has the largest solar PV inverter market share?

Asia Pacific is expected to account for the largest solar PV inverter market share, driven by the growing demand for renewable energy and the need for energy independence. The region is home to many developing countries, including China and India, where there is considerable growth in solar photovoltaic (PV) installations.
