

Analysis of solar power generation target market

Overview

Integration of New Technologies to Hold Immense Growth Opportunity Better prediction capabilities provided by artificial intelligence are facilitating better forecasting and asset management, while its automation capability is driving operational excellence, leading to competitive advantage and cost.

Countries Aiming to Achieve Green Energy Targets to Increase Investments in Solar Industry An energy transition is needed urgently, globally, to limit the increase in average global surface temperature to below 2°.

High Investment and Lack of Infrastructure Remain a Threat to Market Growth The total cost of solar PV is higher than installing regular solar panels, likely reducing its acceptance in.

The market has been geographically analyzed across five central regions, Europe, North America, Asia Pacific, Latin America, and the Middle East & Africa To get more information on the regional analysis of this market.
