

Anti theft system this system has lost power

Overview

How does an anti theft system work?

This anti-theft system replaces a part of the fuel line, and you control it by turning a knob. Fuel will flow to the engine in the open position but will not flow through in the closed position. This device cuts power to the fuse box using a switch. You can run wires to it, which enables you to hide the switching mechanism inside the cabin.

How to deactivate the anti-theft system?

To deactivate the anti-theft system, car owners must first use the key to unlock the door. Then, change the switch of the ignition to the “on” position.

What happens if the anti theft system fails?

Typically the anti theft system must be repaired before the vehicle can operate at all. There are some failures that will allow the vehicle to operate, but any issue with the anti theft system leaves the driver and passengers at a risk for being stranded or locked out.
