

# Application of solar energy in kerala

## Overview

---

How much solar power does Kerala have?

Despite interest and potential in the state, the target remains a tall order. Kerala has anywhere between 130 and 140 megawatt (MW) of solar photovoltaic (PV) installations, which includes big ticket projects like the Solar Energy Corporation of India (SECI)-owned 50 MW and Cochin airport's 40 MW.

Does Kerala have a solar energy program?

Phase 2 of the program has significantly increased the state's rooftop solar capacity by 127.5 MW. Kerala's solar energy success is credited to pricing interventions and proactive initiatives, enabling consumer access and meeting installation targets.

Why is Kerala focusing on solar rooftop systems?

To solve this problem, the state has chosen to focus on rooftop systems to achieve its solar energy goals. Kerala State Electricity Board Limited's (KSEBL) Soura program is an organization that supports adoption of residential solar rooftop systems. But Kerala faces a unique challenge regarding this and that is its geographical landscape.

Who uses solar power in Kerala?

Notably, 90.32% of these consumers are domestic. Commercial users constitute 9.14%, while agricultural and industrial sectors make up 0.13% and 0.41%, respectively. "Solar electricity generation in Kerala has touched 10% of the total power generation.

Will solar power help Kerala cover 10% of its electricity needs?

Combined with the 20,000 houses that already put in solar panels under an earlier initiative, the new Soura project will help Kerala cover about 10% of its electricity needs through solar, according to KSEB, the state's electricity board.

Are solar panels transforming Kerala's power consumption?

KOLLAM: Marking a significant change in Kerala's power consumption, more households are gravitating towards solar energy in the state to handle their daily electricity needs. Going by the KSEB data, Kerala saw the installation of 1,08,056 solar panels under various schemes, having a total capacity to generate 615.39MW.
