Applied solar energy: An introduction /2nd edition/

After a brief review of the history of solar energy applications, the book considers the energy resource, giving attention to solar flux and weather data and solar energy availability. The optics of solar collection is examined in detail with consideration of luminance, refractive optics, mirror optics, fixed-mirror collectors, and optical surfaces. Absorption, transfer and storage are

Marjorie Meinel

Marjorie Pettit Meinel (born Marjorie Steele Pettit; May 13, 1922 - June 24, 2008) was an American astronomer and optical scientist. Her research focused on telescope design and optics, the technological applications of solar energy, atmospheric phenomena including the optical effects of volcanic eruptions, and the study of variable stars. [1]
