

Assembly diagram of solar shower bracket

Overview

How do I install a shower bar?

or the wall fixing bracket. Fit the wall plugs and fix the bracket to the wall using the screws supplied. Refit the bar into the shower unit and loosely fit the concealing cover to the riser arm. Ensure lower bar is fitted correctly as shown in diagram below. Fit the riser arm onto the wall fixing bracket and tighten the grub.

How to install a solar shower?

Use a rag to prevent scratching the front panel. 4. Install the solar shower vertically and place it in a flat and firm surface. 5. Take a marker and indicate the four holes of the holding board, where the screws will be placed, and we put the shower back in the box in horizontal position to avoid any damage. Page 4 12.

How do I install a support bar wall bracket?

Use a pencil to outline the mount bracket on the wall. Remove support bar wall bracket. Place wall bracket on wall within the pencil mark and mark the centre hole on the wall. Drill 8 mm hole into wall, insert wall plug, screw mount bracket to wall. Re-install support bar mount bracket. Please avoid moving panel or excess water on panel for a minimum 24 hours. After.

How do you install a shower hose retaining ring?

Attaching the Shower Fittings Fit the hose retaining ring and clamp bracket to the middle bar, then screw all three bars together. Fit the wall bracket into the riser arm with the grub screw at the top. Make sure that the lower bar is pushed fully into it.
