

Ata solar energy

Overview

Who is ATA renewables?

ATA Renewables is a lean, independent, renewable energy firm with more than 261 GW of expertise in projects worldwide. Of which 153.8 GW in Europe and 17 GW in ATA Storage. We provide engineering and advisory services for renewable energy, especially solar, wind, energy storage, green hydrogen, and hybridization.

What is ATA storage?

ATA Storage division has been created to provide specialized ad-hoc technical services for projects including electrical storage. We have extended our scope and rest of our identity marks (including our mission and values) to this new brand within ATA Renewables.

Who is ATA insights?

ATA Insights is our knowledge partner and sister company, providing independent consultancy services in market research, events, marketing and communications. Its webinars for renewable industry, ATA Webinars, are a reference in the renewable energy & decarbonization industries.

How many GW are there in Europe and ATA storage?

Of which 153.8 GW in Europe and 17 GW in ATA Storage. We provide engineering and advisory services for renewable energy, especially solar, wind, energy storage, green hydrogen, and hybridization. We have offices in Spain, Mexico, Colombia, Chile, Italy, and Australia; from where we operate internationally.

Data on incident solar energy

Instrumentation for solar irradiance monitoring, and radiation scales are discussed in a survey of incident solar energy data. The absolute accuracy and intrinsic reliability of the values of the solar constant and zero air mass solar spectrum proposed by the Institute of Environmental Sciences as an ASTM standard are evaluated. Extraterrestrial observations are used for deriving solar
