Au optronics solar panels

Overview

Is AU Optronics Corp's solar module business profitable?

AU Optronics Corp's (AUO, 0050) solar module business has been profitable for a second straight year this year, benefiting from growing demand for renewable energy in Taiwan, the LCD panelmaker said yesterday.

Who is AU Optronics?

AU Optronics Corporation is a leading global manufacturer of TFT-LCD with 16% worldwide market share, dedicated to greener products, manufacturing, and the way of living. BenQ Solar leverages the manufacturing strength of AU Optronics to produce top quality and innovative solar products to worldwide customers.

Will AUO build large-scale solar energy plants in 2023?

We have made progress in landing [deals to build] large-scale solar energy plants. Order visibility is clear," Ko said. AUO expects its solar energy installations to produce up to 500 megawatts in 2023, more than doubling from more than 200 megawatts this year.

What does AUO do?

AUO has invested in the solar energy industry and gradually established its four major solar service areas through integration of resources and collaboration with partners. Quickly adjusts the frequency of the power system, maintains the stability of the power supply system, and expands applications and development of renewable energy.

Is AUO a good brand?

Certified by fire resistance standards including IEC 61730-2 (ANSI/UL 790) and Taiwan CNS standard (VPC) and passed a test standard 3x more stringent than IEC standard. As the global-leading manufacturer in the PV industry, AUO has been rated as Top Brand PV in the module category by the market

research firm EuPD Research for many years.

Will AUO make profits next year?

We have evolved to be a provider of various solar services,” AUO president Frank Ko (柯俊雄) told reporters on the sidelines of a media briefing arranged by the Taiwan Display Union Association (台灣顯示器業協會) in Taipei. AUO is bullish about next year’s solar business outlook, he said. “We will continue to make profits next year.
