

Average cost of solar panels in massachusetts

Overview

As of Oct 2024, the average cost of solar panels in Massachusetts is \$2.87 per watt making a typical 6000 watt (6 kW) solar system \$12,067 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. Are solar panels tax deductible in Massachusetts?

Solar panels and other renewable energy systems are exempt from the Massachusetts sales tax, which is normally 6.25%. So if you buy a 5 kW solar energy system for \$17,800, you immediately save \$1,112 at checkout. In Massachusetts, any increase in home value after installing solar panels is not taxed for 20 years.

How much does solar cost in Massachusetts?

Levelized cost of power from this typical solar system installed on a home in Massachusetts over 25 years is 1.7 cents/kWh. Average cost of utility power over 25 years (if you don't get solar) is 41.6 cents/kWh. This shows that solar is a far cheaper way to power your home in Massachusetts over the long term.

How much does a 5 kW solar system cost in Massachusetts?

While a 5 kW system will only cost you \$16,339 in Massachusetts, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Massachusetts?

.

How much is a solar panel tax credit in Massachusetts?

With the ITC, if you install a residential solar panel system before the end of 2032, you can deduct 30% of the system's total cost from your federal taxes. The sooner you take advantage, the better: The credit drops to 26% in 2033

and 22% in 2034. The average ITC value in Massachusetts is \$5,733 in 2023.

Are solar panels worth it in Massachusetts?

Solar panels are worth it in most areas, including Massachusetts. Certain factors, including the cost of electricity, incentives, climate, and the angle at which the sun hits your roof impact how quickly you break even on your investment relative to other areas around the U.S.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.
