

Average cost of solar system in arizona

Overview

As of Oct 2024, the average cost of solar panels in Arizona is \$2.64 per watt making a typical 6000 watt (6 kW) solar system \$11,071 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. How much do solar panels cost in Arizona?

As of September 2024, the average solar panel system costs \$2.15/W including installation in Arizona. For a 5 kW installation, this comes out to about \$10,747 before incentives, though prices range from \$9,135 to \$12,359. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

How much does a 5 kW solar system cost in Arizona?

While a 5 kW system will only cost you \$10,747 in Arizona, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Arizona?

.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.

How many kWh do solar panels produce in Arizona?
