Overview

The quarterly electricity price statistics have the most up-to-date electricity prices and provide information about different types of price contracts (spot price, variable price and fixed price).

The quarterly electricity price statistics have the most up-to-date electricity prices and provide information about different types of price contracts (spot price, variable price and fixed price).

Øre/kWh Electricity prices and grid rent for households, quarterly. Øre/kWh Download table as . Download table as . Electricity prices and grid rent for households, quarterly. Øre/kWh 1 The Norwegian government launched a temporary electricity support package for households lasting from.

The average electricity price (including taxes but excluding grid rent) range between 0.50 to 1.00 Norwegian Krone (NOK) per kWh. However, it's essential to check updated sources or utility websites, as these figures can fluctuate based on the factors mentioned above. While we've discussed average.

One of the best services to see the electricity prices on a hourly basis is VG's " Strømprisen " service. This gives you the hourly electricity prices including VAT, meaning it's very close to what you will actually pay for using it. You need to start typing in the name of your municipality to find.

For example, the 2024 average household price (including grid and taxes, excluding one-time support) was about 134.9 øre/kWh. This breaks down as roughly 59.9 øre/kWh actual electricity energy cost, 36.0 øre/kWh for grid rent (transmission + distribution), and 39.0 øre/kWh in taxes.

Hydropower dominates, accounting for around 88-90% of the country's electricity generation thanks to nearly 1,800 hydro plants and over 1,200 reservoirs. Wind power has surged in recent years, now providing about 9-11%, while solar, although small at <1%, is rapidly gaining ground through private.

Nor. How much does electricity cost in Norway?

As Norway continuously upgrades and expands its energy infrastructure, the costs associated sometimes translate to temporary spikes in electricity prices. The average electricity price (including taxes but excluding grid rent) range between 0.50 to 1.00 Norwegian Krone (NOK) per kWh.

How does rainfall affect electricity production in Norway?

Given that hydroelectric power dominates Norway's energy scene, the amount of rainfall the country receives directly impacts electricity production. Abundant rainfall usually corresponds to higher production and potentially lower prices, while dry periods can result in higher prices due to decreased production.

How do I compare electricity providers in Norway?

Numerous platforms and websites provide comparisons of electricity providers in Norway. While many are in Norwegian, some platforms are available in English or offer translation options. Look for providers' customer ratings, the sources of their electricity, and any added benefits or offers.

How can insulation reduce electricity costs in Norway?

Given Norway's cold climate, a significant portion of electricity costs can come from heating. Proper insulation can significantly reduce these costs. Ensure your windows, doors, and walls are adequately insulated. If you're renting, speak with your landlord about potential insulation upgrades.

What are the taxes for households in Norway?

Taxes for households consists of tax on consumption of electricity, value added tax (VAT) and subsidies to Enova. All counties in Norway have the same tax rate for the consumption of electricity, apart from some parts of Troms and the whole of Finnmark, which are exempt.

How do I know if my appliances are efficient in Norway?

Look for the Energy Label: In Norway, as in many European countries, appliances come with an energy label ranging from A+++ (most efficient) to D (least efficient). Prioritize those with higher efficiency ratings. Some electricity contracts offer reduced prices during off-peak hours, often during the night.
