

# **Average home energy storage price per 150MW in Zambia**

## Overview

---

elopment of Zambia's electricity mix. While Zambia has the potential to generate 2,300 MW of solar and 3,000 MW of wind, only 76 MW of solar has been installed and no wind power to date. And while 67 percent of the urban population has access to energy, the country trades energy with foreign.

elopment of Zambia's electricity mix. While Zambia has the potential to generate 2,300 MW of solar and 3,000 MW of wind, only 76 MW of solar has been installed and no wind power to date. And while 67 percent of the urban population has access to energy, the country trades energy with foreign.

Cost: PSH is one of the most cost-effective large-scale storage solutions, with a cost of about \$263/kWh for a 100 MW, 10-hour system. Advantages: High capacity and long duration capabilities, making it ideal for grid-scale applications. Are battery energy storage systems worth the cost?

Battery.

With prices dropping 89% since 2010 (BloombergNEF), lithium-ion dominates Zambia energy storage quotations. A 1MW/4MWh system now costs ~\$550,000—cheaper than building a new coal plant! Pro tip: Pair with Zambia's abundant solar for maximum ROI. Need 12+ hours of storage?

Vanadium flow batteries.
