

# Average mobile ESS unit price per 30kW in Mexico

## Overview

---

How much does an ESS system cost?

Increased competition in the commercial ESS space Government incentives (e.g., tax credits in the U.S. and Europe) make systems more affordable. For example, in 2022, a 100 kWh system could cost \$45,000. By 2025, similar systems could sell for less than \$30,000, depending on configuration.

Why did Modo Energy Survey the battery community?

Because of this, Modo Energy surveyed the battery community - to produce this battery cost benchmark. If you finance, own, or develop battery energy storage systems, you can use this data to support procurement and sense-check financial models. To produce this benchmark, Modo Energy surveyed various market participants in Great Britain.

How much does a power plant cost per MW?

This value is in line with typical market conditions worldwide, where the contracted operation of such services is typically between 150,000 USD and 400,000 USD (3 to 8 million MXN) per MW and year.

Can Bess be used for long-term auctions in Mexico?

Financial modeling and sensitivity analysis of the three selected BESS technologies. Chapter six analyzes the feasibility of operating BESS as part of Long-term Auctions in Mexico based on the services that these systems are able to provide and, on the auctions' legal and regulatory framework.
