Buying solar batteries in bulk and the wholesale price will give you the opportunity to set your own price considering the average price range in the local market. First, you can check in which price range your competitors are selling their products. Due to wholesale buying, you may have more scope.

You need to know that solar batteries typically range from \$1,000 to \$1,500 per kilowatt-hour (kWh). When you factor in installation costs, the total price for a fully installed system can range anywhere from \$6,000 to \$18,000, depending on the size and complexity of your system. Let's dive deeper.

Historically, solar batteries have had a reputation for being prohibitively expensive, with many recorded instances where adding storage doubled the cost of a home solar installation. You can expect to pay between \$7,000 and \$18,000 for a solar battery.

Are solar batteries worth it?

Solar batteries are expensive, but financial incentives are available to lower the cost. Prices often depend on the battery's storage capacity, expected life span, brand and other factors. Homeowners often find that solar batteries are worth it for energy security — even if they're not worth it financially.

How many batteries do you need for a solar system?

You can purchase multiple batteries, but the number you need depends on the size of your system, the number of circuits that need to be backed up and the duration of backup you want. That's one reason why the majority of residential solar panel systems in the U.S. are "tied" to the energy grid instead.
