

Average solar plus storage price per 200MW in Vietnam

Overview

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

The Vietnamese authorities released the feed-in tariff levels for ground-mounted and floating PV plants, with or without storage.

For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region. For solar power plants relying on battery storage systems, the FiTs for the three regions will.

For ground-mounted solar farms without battery storage, the maximum price (excluding VAT) is set at VND1,382.7 (approximately US\$0.05)/kWh in the North, VND1,107.1/kWh in the Central region and VND1,012/kWh in the South. Floating solar plants without battery storage are entitled to higher ceilings:.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems. The updated scheme highlights the growing importance of storage in stabilizing the.

evaluated: \$200/kW + \$100/kWh. This converts to a total of \$400/kW all-in for a 2-hour battery storage to green electricity. We thus recommend raising the tariff to cover the costs of investing in more expensive systems evaluated: \$200/kW + \$100/kWh. This converts to a total of \$400/kW all-in for a 2-hour.

- Northern Region: Maximum price of 1,382.7 VND/kWh (excluding VAT).
 - Central Region: Maximum price of 1,107.1 VND/kWh (excluding VAT).
 - Southern Region: Maximum price of 1,012.0 VND/kWh (excluding VAT).
2. Floating Solar Power Plants (Without Battery Storage Systems):
- Northern Region: Maximum.

In 2023, regulatory updates laid the groundwork for a more flexible pricing system, covering both solar and wind energy, including legacy exemptions for older projects. The current pricing mechanism defines a tariff range, with a

maximum ceiling adjusted annually by EVN and the Electricity. How much does a solar plant cost in Vietnam?

Vietnam's Ministry of Industry and Trade (MoIT) has published the new feed-in tariffs for utility-scale solar plants. For projects without battery storage, the tariff will be VND 1,382.7 (\$0.053)/kWh for the northern part of the country, VND 1,107.1/kWh for the central part, and VND 1,012.0/kWh for the southern region.

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

Does Vietnam have new feed-in tariffs for solar power?

April 2025 | Southeast Asia Impact Alliance Vietnam is taking another step toward modernizing its renewable energy sector by unveiling updated feed-in tariffs (FiTs) for solar power, with a notable emphasis on encouraging battery energy storage systems (BESS).

How much solar power does Vietnam have?

According to the latest statistics from the International Renewable Energy Agency (IRENA), Vietnam had approximately 18.66 GW of installed PV capacity at the end of 2024. Last year's new additions totaled around 79 MW. This content is protected by copyright and may not be reused.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

How will Vietnam's new energy storage scheme help investors?

Supa Waisayarat, Vietnam's adversary consultant at Thailand's Super Energy Corporation, noted that the new scheme supports the adoption of storage and

provides developers and investors with more transparent pricing, which could encourage more power purchase agreements (PPAs) and improve financing confidence.

Average solar plus storage price per 200MW in Vietnam

[Type here the title of your Paper](#)

The cost of storage technology is also declining at a significant rate. This is mainly due to developments and research initiatives into technology improvements for large scale roll-out into ...

2021 Solar Statistics in the Country of Vietnam

The country has hit a record high by doubling rooftop solar capacity to 378 megawatts (MW) by the end of December 2020, up from 378 MW in 2019. According to the IRENA Renewable Energy Statistics 2021, Vietnam's ...
