

Backup power quincy

Overview

Why is backup power important?

Reliable backup power is essential to our customer promise—delivering highly available, reliable, and scalable cloud services. Many critical industries, governments, and institutions depend on the Microsoft cloud to support essential operations, even when events such as extreme weather interrupt the primary energy supply.

Are generators a reliable source of backup power?

Generators provide the most reliable source of backup power on a global scale—but they are not the only source for backup power. We are innovating and piloting other backup power sources in our datacenter regions, which could in the future provide viable replacements to generators.

When will we stop relying on diesel fuel for backup power?

In July 2020, we announced our goal to eliminate our dependence on diesel fuel for backup power in our datacenters by 2030. This is in addition to our commitment to having a 100 percent supply of renewable energy procured for our datacenter operations by 2025.
