

Basic price of photovoltaic inverter

Overview

Quick Takeaways: Solar panel inverter costs can range from £500 to £2,500. String inverters are cheaper than microinverters, but the latter offers more advantages and a longer lifespan. Other factors that can impact the solar panel inverter cost include your system size, inverter efficiency, and whether it's grid-tied or off-grid. How much does a solar inverter cost?

Meanwhile, microinverters typically cost around £100-150 per unit. Power optimisers typically cost £40 each, but need an inverter costing around £600 as well. So if you had a 3.5 kW solar PV system comprised of 10 350W panels, you'd need to spend either £1,000-1,500 for 10 microinverters, or £1,000 for £400 worth of optimisers and a £600 inverter.

What is a solar inverter?

An inverter is a vital piece of equipment in a solar panel system and without it, your home would essentially be unable to generate usable power from its solar panels. In this post, we delve into solar inverter costs, the different types of inverters, and their pros and cons. **What Are Electrical Inverters?**

.

What are the different types of solar inverters?

Let's explore the most popular types: hybrid solar inverters, string solar inverters, and micro solar inverters. String solar inverters are the most common type of inverters used in solar power systems. They connect multiple solar panels in a series (string) and convert the combined DC electricity into AC electricity.

How much does a solar inverter cost in 2023?

In 2023 a basic central solar inverter costs around £500 to £1,000 and has a life expectancy of around 10 to 15 years. Other types of inverter such as microinverters and power optimisers are more expensive, but they have a much longer life expectancy - and they can make your entire solar PV system

more efficient.

How much does a string inverter cost?

A new string inverter for an average home costs around £500 to £1,500. Modern inverters are generally included as part of the complete solar PV system, so the type of inverter affects overall installation cost. Solar panels can last upwards of 25 years.

Should you buy a solar inverter?

For the vast majority of households the cost of the solar inverter is always going to be a consideration when switching to solar energy. You want affordable products that perform well to help ease the switch - especially during the UK's cost of living and energy crises that are leaving more households with less money.
