Overview

Should you use a backup battery or a generator?

A backup battery requires less maintenance and eliminates fuel costs compared to traditional backup generators. Set-up is easier, and you'll have a clean, environmentally friendly backup power option. However, a generator can provide power longer, as long as you have enough fuel or solar power to keep it running.

Should you use a home backup power system or a generator?

A home backup power solution can be a lifesaver in any of these situations. A home battery backup system or a backup generator can both help meet your household's essential electricity needs in the event of a power outage. So what's the better option?

There are advantages and disadvantages to each.

Are portable generators better than battery backups?

With that said, portable generators can be a good option in some cases. Unlike battery backups, you only need a single generator to restore power in an outage, which brings down the upfront costs. Plus, standby generators can last longer than battery backup systems in a single session.

Are standby generators better than battery backups?

Unlike battery backups, you only need a single generator to restore power in an outage, which brings down the upfront costs. Plus, standby generators can last longer than battery backup systems in a single session. As a result, they'll be a safer bet if the power is out for days at a time.

Can a backup battery be used as a solar generator?

If you purchase a backup battery system that supports solar charging — like EcoFlow's portable power stations — you can pair your battery storage with

solar panels to create a solar generator. Going solar means you don't have to store or pay for fossil fuels to keep your home powered.

What is a battery backup system?

Lithium-ion or LiFePO₄ (LFP) batteries run clean and store easily, saving you the headaches of a fossil fuel generator. As with any home power solution, a backup battery system has pros and cons. Battery backup systems require little to no maintenance. Batteries can last for up to ten years of regular use.

Battery backup power generator
