

Battery charger makita 18v lithium ion

Overview

What kind of battery does a Makita LXT use?

Makita 18V Lithium-Ion is the world's largest cordless tool line-up powered by an 18V Lithium-Ion slide-style battery. At the heart of the LXT Series is the 18V LXT Lithium-Ion battery and the efficient Rapid Optimum Charger.

What is a Makita 18V LXT® lithium-ion battery?

The Makita 18V LXT® Lithium-Ion battery charges faster and works longer than standard lithium-ion batteries, giving you and your cordless tools unmatched performance and productivity to take on the most demanding applications.

How does the Makita 18V LXT® system work?

At the heart of the Makita 18V LXT® System is the efficient Rapid Optimum Charger. The Rapid Optimum Charger offers key advantages for Makita 18V Lithium-Ion cordless tool users. The exclusive built-in fan cools the battery (sold separately) by forcing air through the battery's air vents during the charging process for faster charging.

What is Makita LXT®?

Makita LXT® is the world's largest cordless tool system powered by 18V Lithium-Ion slide-style batteries. At the heart of the Makita 18V LXT® System is the efficient Rapid Optimum Charger. The Rapid Optimum Charger offers key advantages for Makita 18V Lithium-Ion cordless tool users.

What is the Makita rapid optimum Charger?

The Makita Rapid Optimum Charger (sold separately) is a smart-charging system that communicates with the battery during the charging process to monitor current, voltage and temperature. This advanced charging technology helps optimize battery life and deliver a faster charge.

Do Makita batteries self-discharge?

Makita 18V Lithium-Ion batteries resist self-discharge so they're ready for use even after long periods of storage. The Makita Rapid Optimum Charger (sold separately) is a smart-charging system that communicates with the battery during the charging process to monitor current, voltage and temperature.
