

Battery tender for lithium ion motorcycle battery

Overview

Here is the simple answer: A Battery Tender® can not measure State of Charge (SoC) of a lithium battery. It simply does not have this capability. While they work great on lead acid batteries, they are not able to accurately “read” lithium batteries. So, they will never properly charge a lightweight lithium battery. What is a motorcycle battery tender?

It is ideal for long-term storage of a motorcycle battery. Smart Charger: This type of battery tender is designed to monitor and adjust the charging rate to maintain the optimum charge level. It is suitable for both short-term and long-term battery maintenance.

What are the different types of battery tenders?

Automatic Float Charger: This type of battery tender maintains a battery at a full charge level without overcharging it. It is ideal for long-term storage of a motorcycle battery. Smart Charger: This type of battery tender is designed to monitor and adjust the charging rate to maintain the optimum charge level.

Can a battery tender® charge a lithium battery?

Here is the simple answer: A Battery Tender® can not measure State of Charge (SoC) of a lithium battery. It simply does not have this capability. While they work great on lead acid batteries, they are not able to accurately “read” lithium batteries. So, they will never properly charge a lightweight lithium battery.

What is the battery tender®?

Beyond SoC, the Battery Tender® is looking for a 6 cell battery, with each cell having roughly 2 volts. All lithium lightweight batteries are based on 4 cell packs, with each cell having roughly 3.3 volts. This sends the Battery Tender® a reading that is outside of the safe charging window, and contributes to the incompatibility.

Can A Battery Tender Touch a motorcycle battery?

Do not touch the battery tender while it is plugged in or when it is charging your motorcycle battery. Connecting your battery tender to your motorcycle battery is a simple process. Follow these steps to ensure a safe and proper connection: Turn off the motorcycle and remove the key from the ignition.

How do I connect a battery tender to a motorcycle?

To connect a Battery Tender to a motorcycle, first, ensure that the motorcycle's battery is disconnected from the bike. Then, connect the red charging cable to the red (positive) terminal of your battery, and connect the black charging cable to an earth point on the bike as far from the battery as possible.
