

Be quiet system power 8 500w test

Overview

Is the pure power L8 500W rated for 100% continuous output?

The Pure Power L8 500W features an 80 PLUS Bronze efficiency rating. Finally, the Pure Power L8 500W is not rated for 100% continuous output, but Be Quiet! states that it can make it as that is their standard. Be Quiet! has an MSRP of \$74.90 on the Pure Power L8 500W power supply.

Does pure power L8 500W have a sleeve?

They do keep all of the cables fully sleeved, though. The Pure Power L8 500W features an 80 PLUS Bronze efficiency rating. Finally, the Pure Power L8 500W is not rated for 100% continuous output, but Be Quiet! states that it can make it as that is their standard.

Is system power 8 quiet?

According to be quiet! it's practically inaudible at up to 50 per cent load (300W) and then rises steadily and predictably until full chat. System Power 8 needs to be installed into a wide range of chassis - big and small - so the 140mm depth makes sense. The other dimensions are typical, too, at 150mm wide and 86mm high.

What are be quiet's New L8 models?

The newest additions to Be Quiet's portfolio of products are the fresh L8 units that belong to the Pure Power series. These mostly address the mainstream and mid-end market segments. The new models are six in total, and all of them are equipped with affixed cables to restrict production costs and achieve a lower retail price.

How much does a pure power L8 500W power supply cost?

Be Quiet! has an MSRP of \$74.90 on the Pure Power L8 500W power supply. Be Quiet! still hasn't reached the availability status that many other companies have so you have to do some searching to find their stuff.

Is be quiet a good PSU?

Not really. That's mostly a mainstream PSU and you really want something better for what WAS a fairly high tiered card not long ago. That System power 8, and most of Be Quiet's units to be honest aside from maybe two or three high end models, are not terrible but not terribly good either.
