- PROTECTION IP54/IP55
- BATTERY /6000 CYCLES

Renewables - Global Energy Review 2021 - Analysis

Renewable energy use increased 3% in 2020 as demand for all other fuels declined. The primary driver was an almost 7% growth in electricity generation from renewable sources. Long-term contracts, priority access to the grid, and continuous installation of new plants underpinned renewables growth despite lower electricity demand, supply chain challenges, and construction ...

Benchmark Energy acquires oil and gas production assets in ...

The acquisition is anticipated to expand the Benchmark portfolio, adding approximately 140,000 net acres and approximately 470 operated production wells in the prolific Western Anadarko basin
