

Best backup ups power supply

Overview

Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day. However, typical desktop computers, routers, and similar devices still need to be plugged into.

Our pick for the best UPS overall goes to the APC BR1500G Backup Battery. At 1500VA/865W, it can power most devices, including computers, external hard drives, and wireless.

If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you.

Most laptops have a long enough battery life to last anywhere from a few hours to an entire day. So, if you don't have a larger, more power-hungry desktop, you only need a smaller U.

The Amazon Basics Standby UPS is great for those who want a UPS compact enough to fit in a small space but packs decent power for their equipment. It measures 12.2x7x3.1.
