

Best energy deals with solar panels

Overview

The feed-in tariff was introduced in April 2010 as a way of encouraging households to install renewable and low-carbon energy generators on their homes. It included solar panels and wind.

The Smart Export Guarantee (SEG) was introduced in 2020 as a replacement for the FIT. It covers the following types of installation up to a capacity of 5MW (or 50kW for micro-C).

The latest figures from the Energy Saving Trust suggest the average domestic solar PV installation costs around £6,500. Several elements affect how much solar panels cost inclu.

The scrapping of the feed-in tariff system and the move towards Smart Export Guarantee tariffs managed by energy companies has led to a significant decrease in the level of ret.

Installing solar panels on our home can help us save money on our bills as well as increasing the amount of renewable energy going into the National Grid (and earning us money for selling that excess energy). Solar panels have been subject to two Government schemes to pay householders for energy: 1. The feed-in.
