Overview

Tanks of lava. Railcraft's Iron Tanks will do - they have geometric progression of capacity/materials. You can convert energy into lava with TE Magma Crucible, and lava to energy with Magmatic Dynamo. Along with this, tanks of Buildcraft fuel also work. Are FTB revelations good power sources?

FTB Revelations good power sources?

Currently using 2 automated magma dynamos @ 160rf/t (pulling lava from nether), and a few automated ender generators (which i found gives 40rf/t per pearl, and speed upgrades wont work for some reason) i dont want to build a high tier uranium reactor thing because i have less than half a stack of diamonds.

What is the best way to store energy in modded MC?

The best methods in modded MC of storing energy have to be the gregtech AESU/IDSU or the Electricraft Auroral battery. Both are stupidly expensive. I was just playing modded minecraft and was wondering what the best way to store energy is, preferably something cheap to make but holds lots of power. What do you guys use?

.

Would you add energy storage to e-flux?

A nice thing about the Extra Utilities generators is that they hold the RF they generate (up to 500,000 I think). Speaking of, maybe @ Strikingwolf would consider adding energy storage to E-Flux. I would store my power in the Mekanism Energy Cubes, if I ever wanted to be efficient about it.

Redstone Flux

Redstone Flux (RF) is a form of energy that was originally implemented by Thermal Expansion 3, replacing the previously used Minecraft Joules and thereby removing the dependency on BuildCraft. RF acts as a highly simplified form of electricity that is designed to be easy to use and low on server impact. Introduced in CoFH Core and later made available as a separate mod, ...

Energy Storage Upgrade

Place one or more energy storage upgrades into the four right-most slots to upgrade a machine. Each upgrade increases the storage capacity by 10,000 EU . Its main purpose is for use when a machine's energy consumption becomes too large for its internal storage to handle; this only happens when a high number of Overclocker Upgrades are present.

How to generate massive power at early/mid game?

If you use Speed III as well it's about 25k RF/t. In terms of fairly early power, I like to make a big tree farm (with MFR) for wood, which I then turn into charcoal, and then burn for RF (either directly, or indirectly by making steam). For extra power, you can try

Places/Dimensions to explore (FTB Revelation) : r/feedthebeast

I recently had to re-start on the Revelation server I am playing on, and as I am building up my capabilities again, I am thinking about places/dimensions I haven't explored much or at all. This iteration was the first time I have gone to the Deep Dark, for instance.

FTB revelation

Once you have set up an apiary with an energy bee, put some kind of energy storage block right next to it (the energy cell from Thermal Expansion works great) and you're good to go. I managed to get around 15000 rf/t from just one apiary with my bees but there's still room for improvement.

Best quarry system in FTB Revelation? : r/feedthebeast

RFTools Builder is cheap, has somewhat low energy cost, and actually destroys the land. Tier 6 Void Ore Miner from Environmental Tech basically generates ore, and doesn't destroy land, but it's super expensive, takes a lot of time to make, and has a higher energy cost.

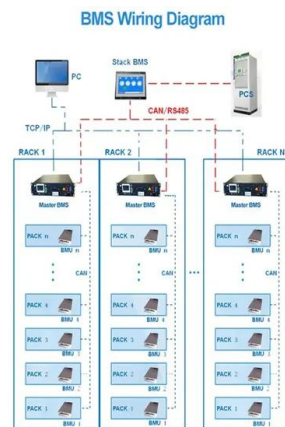

What is a good and long lasting source of power in FTB revelation?

I think I was using xnet for power distribution. I had a DE energy cell in my base and used xnet to send power to it from the reactors. So, long story short I think the best long lasting source is to ...

Batteries or Energy containers in Revelations? : r/feedthebeast

Hi guys, I'm new to the FTB world, playing on FTB Revelations. I need a way to store lots of energy in a small container, like the Energy Cell (Basic) block from Thermal Expansion. If I can use small containers, great, but I also need something that I ...

Energy transport is provided primarily by Energy Conduits and energy storage primarily through Energy Cells. Many other mods add their own storage/transport mechanisms (e.g. EnderIO 's Energy Conduits and its Capacitor Bank), and power generation is incredibly varied, with a wide variety of early-/mid-/late-game generation possibilities, including those added by Big Reactors .
