Overview

An important part of solar installation is determining what size system, or how many solar panels, will work best for your home. To best determine how many solar panels you'll need, be ready to give companies the following information:

1. How much available space is on your roof
2. The amount of energy your

Solar companies offer different warranties on their products and services, but you can find some common themes among the most prominent companies. For example, most solar companies and.

Knowing the median household size in Long Island, which is 2,457 square feet, and the average amount of energy each home uses in New York—599 kWh per household—can help you determine how much electricity your home will need to function efficiently. Once.

In addition to picking the solar installation company that's best for you, you'll also need to do some research to help determine which type of solar panels will work best for your home.
