What is the best portable solar generator?

Its Delta 2 Portable Power Station paired with the 220-watt (W) Bifacial Portable Solar Panel is our favorite portable solar generator setup. It's not small and light, with the power station itself weighing in at 27 pounds, but it's not unmanageable for most.

What is a solar generator?

Solar generators are smaller-scale versions of whole-house solar panels and batteries. Portable power stations have been available for a while now and using home solar panels to charge on the go is the next logical step. Combine portable power stations with portable solar panels and you have yourself a solar generator.

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

Which solar generator should I buy?

With its durable enclosure and ergonomic design, the GB2000 is our top pick for a solar generator you can take anywhere. The 2,106 watt-capacity lithium-ion battery packs plenty of power into relatively compact housing, and the so-called "parallel ports" make it possible to combine two power stations, doubling the total power output.

What are the best portable solar panels?

The portable power station component is the Jackery Explorer 2000 Pro and the solar panels are the Jackery Solar Saga 200 panels, our favorite portable solar panels. The combination's light weight means it's easier to move than competitors with similar battery sizes. It also stores more charge in a shorter amount of time.

Which solar powered generator is right for You?

If you need something portable for a camping trip, then the Jackery 500W might be your best new travel buddy. When deciding what solar powered generator is right for you, consider which types of appliances, tools, and devices you need to charge and how often you'll be without a traditional power source.
