Overview

Solar Panel Performance Most solar PV systems produce an output of around 300-450 Watts per panel, although some can deliver as much as 500+ Watts. But don't just look at this headline figure. If you want your solar panels to perform in the long-term, another key consideration is their annual degradation - that is, how.

We use a combination of methodologies for our solar panel reviews and recommendations, and we identify which approach we've used when assessing each product.

Reviewed by Chris Batesmith

1. Guide price: Around £200 per panel (depends on supplier)
2. Maximum power output: 325W per panel
3. Efficiency rating: Up to 19.1%
4. Warranty: 30-year product warranty; 30-year performance.

The best solar panel system for your home or project will depend on a range of factors, including your budget, the power output you require, how and where they're to be installed, and the.
