

Brio solar energy review

Overview

Are BRIO solar panels a good choice?

We had a good start with Brio. Their friendly sales rep showed us how we would save because Brio's solar panels will cost the same as our current energy usage, loan terms were low, they'll do all our permit requests, even for our HOA, and help with securing tax rebates to offset some of the expense.

Is Brio energy still in business?

Brio Energy is no longer in business. Brio Energy was absorbed by Avolta and is no longer in business. Brio Energy is a residential solar power provider that was founded in 2015 in Las Vegas, Nevada. The company strives to provide clean, cost-efficient renewable energy to families while also helping them reduce their monthly energy bill.

Is Brio a good company?

If you are interested in converting to solar then look no further. Brio was a great decision. This company was so easy to work with. Their customer service was great and very responsive. My wife and I are very happy with using Brio. Sales people promised things we never received and promised lower energy bills, but in fact we pay more.

Does Brio energy offer a warranty on solar panels?

All solar energy systems installed by Brio Energy include a 25-year warranty on residential solar panels from the manufacturing company. In addition to this, Brio Energy also offers a 25-year warranty on materials and labor to give homeowners confidence in their rooftop solar systems.

How much does a Brio Solar System cost?

In all of the quotes I have received Brio has also been the highest price. In some cases by as much as \$5,000 and that was for a better rated system that still had the same warranties. There are several good solar companies out

there and I still plan to go solar, but I highly recommend steering clear of brio. Beware!.

What happened to Brio solar?

Brio Solar was a 12 month nightmare. They had no clue about how to work with our local utility. Their staff turned over constantly and new staff just made things up to appease us. They told us our system was operational in early May, but when our bill came in late June it was not. After it was operating they stopped responding to our emails.
