

# **Business energy storage project financing options in Nepal 2026**

## Overview

---

What types of financing does Nepal Bank offer?

- Financing rooftop solar projects. Here, the bank welcomes both CAPEX as well as financing under the RESCO model.
- Financing utility-scale solar projects that sell energy to Nepal Electricity Authority.
- SafaTempo and Electric Vehicles.
- Green Home Loans for Green Buildings
- Finally, the bank also prioritizes financing in Energy Efficiency.

When will Nepal's largest energy storage project be completed?

The project said the overall construction is set to be completed by May 2026. The project will be one of Nepal's biggest storage-type projects, with an estimated annual energy generation capacity of 587.7 GWh for the first 10 years and 489.9 GWh from the 11th year. During the dry season, the project can generate energy for six hours daily.

How many storage projects are there in Nepal?

Nepal has only two storage projects—Kulekhani I (60 MW) and Kulekhani II (32 MW). The project, which will be Nepal's third storage type, is 150 km west of Kathmandu on the Seti river near Damauli in the Tanahun district. Shyamji Bhandari, project chief, said grouting is being done in the lower level area of the main dam under package 1.

How can Nepal achieve a balanced energy mix?

Nepal is committed to achieving a balanced energy mix by emphasizing the use of Renewable Energy sources. NMB has taken an active role in supporting businesses involved in the Renewable Energy Sector, encompassing solar, biogas, micro-hydro, clean cook stoves, solar dryers, solar pumps, improved water mills, and electric vehicles.

How much does the Nepal Electricity Project cost?

The government and the Nepal Electricity Authority will use their money to

build the infrastructure during pre-construction. The project is estimated to cost \$505 million, and the Nepal government will contribute \$86 million.

What is the financial progress of Kulekhani project in Nepal?

Divided into three packages, the overall financial progress of the project is 58 percent. Nepal has only two storage projects—Kulekhani I (60 MW) and Kulekhani II (32 MW). The project, which will be Nepal's third storage type, is 150 km west of Kathmandu on the Seti river near Damauli in the Tanahun district.
