Utility-Scale Renewable Energy Generation Technology Roadmap

PREPARED BY: Primary Author(s): Harrison Schwartz Sabine Brueske Energetics 7075 Samuel Morse Dr Suite 100 Columbia, MD 21046 410-290-0370 Contract Number: 300-17-005
PREPARED FOR: California Energy Commission Silvia

California exceeds another clean energy milestone

SACRAMENTO - California's battery storage capacity has expanded rapidly, increasing by 3,012 megawatts (MW) in just six months to reach a total of 13,391 MW. This growth marks a 30% increase since April 2024, underscoring the state's swift progress in building out clean energy infrastructure, especially during a summer marked by record-breaking heat.

[Solar Permitting Guidebook 4th Edition](#)

In order to expand small-scale renewable energy across California, the Governor's Office of Planning and Research (OPR) was instructed to help remove barriers to its development. One such barrier is the patchwork of permitting requirements for small solar Solar

California's Renewable Energy Penetration And Electricity Rate

On September 10, 2018, former Governor Edmund G. Brown Jr. signed Senate Bill (SB) 100 (De León, Chapter 312, Statutes of 2018)

increasing California's RPS target to 60 percent by 2030 and adding a planning target of 100 percent renewable and zero-carbon

New Data Shows Investments to Build California's Clean Energy ...

As California invests billions in energy infrastructure, the clean energy supply continues to increase as the state progresses toward the goal of 100 percent zero-carbon electricity sales by 2045. SACRAMENTO -- Non-fossil-fuel sources now make up 61 percent of retail electricity sales in California thanks to historic investment that has led to an extraordinary ...

List of power stations in California

As of 2018, California had 80 GW of installed generation capacity encompassing more than 1,500 power plants; with 41 GW of natural gas, 26.5 GW of renewable (12 GW solar, 6 GW wind), 12 GW large hydroelectric, and 2.4 GW nuclear.

A Novel, Renewable Energy Microgrid for a California Healthcare

The California Energy Commission awarded a \$4.78M grant to Charge Bliss, Inc. through PON-14-301 to design, engineer, build, and operate the first renewable energy microgrid for a hospital in California at the Kaiser Permanente facility in Richmond, California. The hospital is the only general hospital serving western Contra Costa County providing essential services ...

New Data Shows Growth in California's Clean Electricity Portfolio ...

To complement California's abundant renewable energy resources, the state is focused on deploying energy storage. According to the California Independent System Operator, battery storage capacity has increased by nearly 20 times since 2019 -- from 250 megawatts (MW) to 5,000 MW.

[Electric Generation Capacity and Energy](#)

The data is collected under the authority of the California Code of Regulations, Title 20, Division 2, Chapter 3, Section 1304(a)(1)-(2). Data reflects the CEC-1304 QFER Database as of May 8, 2024. Download data for Electric Generation Capacity Energy - Excel
