

# Campervan lithium battery

## Overview

---

What is the best leisure battery for a campervan?

Throughout this guide we will explore every aspect of campervan leisure batteries in-depth. However, if you want to cut right to the chase. The best leisure battery for campervans are lithium iron phosphate (LiFePO4) batteries. I highly recommend the 200Ah LiFePO4 battery from Renogy.

What are the best campervan battery brands?

There are a few very popular brands, including Ecoflow, Jackery, and GoalZero. My top pick is still Renogy - their portable power bank definitely gives you the most bang for your buck. In this article we go DEEP on campervan leisure batteries. Gel leisure batteries, lithium ion leisure batteries, AGM leisure batteries.

What are campervan batteries used for?

To put it more simply: electricity is stored in batteries. Campervans are powered by leisure batteries - batteries which provide a steady flow of current over a prolonged period. Leisure batteries for van conversions are typically 12V and are used to power everything from the fan and fridge to heater and lights.

Are lithium campervan batteries cheap?

On the downside, lithium campervan batteries, in general, aren't cheap. But the price difference means you aren't limited to AGM functionality such as only being discharged to around 60% of their capacity and relatively slow recharge rate.

How long do campervan batteries last?

Lithium batteries are the greatest. They have an average lifespan of a decade and can even last up to 20 years if adequately maintained. When it comes to powering your campervan battery bank, sometimes you may want to connect

multiple batteries to increase the amperage or voltage of the battery.

Do you need a 12 volt battery for a campervan?

Typically campervan electrical systems run on 12V and thus you would want to install 12-volt batteries inside your van as they are cheap and easy to find. At the same time, 6V batteries have more amperage when connected in series and have more charge cycles than standard 12V batteries.
