

Camry Solar Power Generation

Overview

How much power does a 2025 Toyota Camry have?

Now sold exclusively as a hybrid for its ninth generation, the 2025 Camry is equipped with a steady 2.5-liter, 4-cylinder engine. Paired with a permanent magnet synchronous motor for a combined 225 horsepower with front-wheel drive and 232 horsepower with on-demand all-wheel drive, this Camry starts off with the most standard power in its history.

Does the 2025 Toyota Camry have a hybrid engine?

If you're familiar with any of Toyota's other new hybrids like the Crown Signia, the 2025 Camry's powertrain will seem quite familiar. This latest iteration of Toyota's hybrid system combines a naturally aspirated 2.5-liter four-cylinder gas engine with either two or three electric motors.

What's new with the 2025 Toyota Camry?

Here are five things about the 2025 Toyota Camry that are sure to build some excitement in the run-up to its expected arrival at dealerships this spring. Toyota is committed to reducing carbon emissions as part of a carbon-neutral future.

How much power does a Toyota Camry have?

Combined with the established 2.5-litre, four-cylinder hybrid engine, these changes increase the full system's maximum power to 230 DIN hp / 169 kW (+6%), while reducing fuel consumption and CO₂ emissions to 4.8 l/100 km and 109 g/km respectively (WLTP combined cycle).

Does the Toyota Camry have AWD?

To help drivers reach their destinations the AWD system provides additional traction when needed. The Camry is designed to help navigate snowy or icy roads as well as uneven surfaces. The AWD system's capability comes from a dedicated rear electric drive motor generator that automatically supplies

power to the rear wheels when needed.

What's new in the Toyota Camry?

The most significant change is at the front where the Camry adopts a “hammerhead” shape, applying a new Toyota design language that has also helped shape the all-new Prius and Toyota C-HR. This generates a low, swept look, emphasised by the slim and sharply angled new headlight and daytime running light units.
