

Can I buy solar panels

Overview

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Are solar panels worth it?

The investment in solar panels is worth it for the average UK home. For example, the typical 3-bedroom house in the UK is equipped with a 4kW solar panel system, enabling homeowners to potentially save around £600 annually on electricity expenses.

Can I get solar panels installed in my home?

There's help available to get solar panels installed in your home, but you usually need to be on certain benefits or have a low income to be eligible. What each scheme offers, and its eligibility criteria varies: The Energy Company Obligation (ECO) scheme.

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.

Are solar panels a good investment?

Solar panel owners we've spoken to have had some quite different motivations: Wanting to charge their electric vehicle from solar panel electricity so that it's guaranteed 'green energy'. A long-term investment that's future-proofing against electricity price rises. Trying to reduce their

carbon footprint and do their bit for the environment.

Do you own solar panels?

You OWN the solar panels. Under these schemes, you pay for solar panels over a fixed period, say 20 years. There are no upfront costs, and instead you pay a monthly fee, which usually covers the solar panel and battery installation, repairs and maintenance.
