

# **Can i install solar panels and sell the power company**

## Overview

---

How do you sell solar energy back to the grid?

Selling electricity back to the grid, also known as an export rate, or net metering, is a process that allows solar panel owners to generate their own electricity and earn credits for excess energy they feed back into the grid. Here's a detailed explanation of each step involved in sell solar power: 1. Installation of solar panels:.

Can a new solar installation save you money?

Not only will a new solar installation give you renewable energy, but it can help lower energy costs or even put money back into your pocket. Contact Airis today to learn how solar panels can slash your energy bills, and allow you to start selling electricity back to the energy company.

Can you make money selling solar panels?

Those savings on energy bills — plus the rebates one can get for going solar — make solar panels pay for themselves and go on to keep earning the owner profits. Opting for net billing can also help someone pay off their solar panels sooner rather than later. Can You Make Money Selling Electricity?

.

Can you sell solar power to the grid?

Although many people with solar systems on their homes or businesses think that they can sell excess electricity to the power grid, the reality is that you can only sell power to the grid if you have an electricity generator's license and qualified power-generating assets.

How do you sell back solar power?

Read on to learn about the different ways to sell back power. This is the most common way consumers believe they can sell electricity to the grid. However,

the way that you can earn income from excess solar power is through net metering. Currently, there are over 35 states that offer a net metering program for solar system owners.

Can you sell a home with solar panels?

And despite common fears about the process, selling a home with solar panels is usually pretty easy -- as long as your realtor is up to speed on how it works. In an era when incentives are high and the cost of solar is low, experts say you shouldn't let the prospect of resale stop you from investing in the technology.
