Will homeowners be able to install rooftop solar panels more easily?

Homeowners will be able to install rooftop solar panels more easily without costly planning delays. This was published under the 2022 to 2024 Sunak Conservative government. Homes and businesses will be able to install rooftop solar panels more easily, under new rules announced today.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Are solar panels good for a roof?

When solar panels are attached to the roof they can block some of the adverse weather, and in theory your roof could last longer. Roof solar panels also have a cooling effect. By absorbing the sunlight that would otherwise penetrate your roof without solar panels, they keep temperatures down.

Can I use solar roof tiles instead of solar panels?

What you need to do is speak to your local council and let them know about your decision to install. Unless there is a valid reason to state otherwise, permission for the installation should be granted. In some conservation areas (such as historical ones), it may be requested that you use solar roof tiles instead of panels.

How many solar panels can you install on a rooftop?

Installing solar panels offers many benefits, and it makes financial sense to get as many panels as possible once your scaffolding is set up. Providing the panels don't sit closer than 400mm from the edge of your rooftop, you can install as many panels as you want.
