

Can solar panels be installed on a slate roof

Overview

You can absolutely install solar panels on a slate roof – but it’s more complicated than it is with most roofs. With enough time, care, and knowledge though, a certified installer can fit a series of solar panels without damaging your tiles or altering the rest of your roof in any noticeable way. Can I install solar panels on a slate roof?

If you are a UK homeowner with a slate roof, interested in installing solar panels contact our award-winning team on 01322 479369 or simply click request a free quote. Whilst slate roofs are strong, they are brittle. This makes installing solar panels on a slate roof incredibly intricate and labour-intensive.

Can solar panels damage a slate roof?

When installed correctly by experienced professionals, solar panels should not damage a slate roof. However, if installed improperly, there is a risk of cracking or breaking a significant number of slate tiles, which can lead to costly repairs.

Can a certified solar installer fit a slate roof?

With enough time, care, and knowledge though, a certified installer can fit a series of solar panels without damaging your tiles or altering the rest of your roof in any noticeable way. The proof is in the pudding or, in this case, on the slate roofs of countless UK homes that have already gone solar.

Why are slate roofs so difficult to install?

Weight: Slate roofs are heavier than typical shingles, requiring additional considerations for the weight of solar panels and mounting equipment.
Complex Installation: The uneven surface of slate tiles can make the installation process more intricate. Given these challenges, how do we ensure a successful solar panel installation on slate roofs?

Can a slate roof be installed on a metal roof?

Unlike installing solar panels on a metal roof, slate tiles are prone to breaking and cracking. A few slate tiles will inevitably crack or break in the installation process. Good replacement material for these tiles is artificial slate. This is more cost-effective than purchasing single tiles of real slate.

Do solar installations on slate roofs cost more?

Solar installations on slate roofs do typically cost extra, as they require more care, time, tools, specialist skills, and replacement tiles than other projects. Just as it's worth waiting longer for a better end product, it's also usually worth paying a bit more for a job well done.
